

Dumeta D-HGZ-10 (1125-6535)

Control type
konventionell

Construction year
NEU

Machine no.
1125-6535

Make
Dumeta

Location
D - 49779 Niederlangen

The self-adjusting D-HGZ roller blocks adapt to the different diameters of your workpieces yourself. This roller block is designed for particularly heavy work. Furthermore, this roller block is suitable for thin-walled workpieces, as the four wheels per unit deliver improved pressure distribution.

Characteristics:

- Top quality electronic components
- Infinitely variable speed of the drive unit
- Wheels fitted with solid rubber tires enclosed in one steel construction
- Heavy construction enables very high stability.
- Good value for money allows for quick recovery of your investment.
- The D-HGZ range is supplied as a standard version and includes a Remote control with digital reading.

Accessories:

- Double foot pedal (start-stop/left-right)

- Remote control (on the cable
