

Dumeta D-HGZ-5 (1125-6534)

Control type
 konventionell

Construction year
 NEU

Machine no.
 1125-6534

Make
 Dumeta

The self-adjusting D-HGZ roller blocks adapt to the different diameters of your workpieces yourself. This roller block is specially designed for heavy-duty activities. Furthermore, this roller block is suitable for thin-walled workpieces, as the four wheels per unit are an improved supply pressure distribution. || Features: | - Electronic components of top quality | - Infinitely adjustable speed of the drive unit | - Wheels fitted with solid rubber tires enclosed in one steel construction | - Heavy construction enables very high stability. | - Favorable price-performance ratio enables quick recovery of your investment. | - The D-HGZ series is supplied as a standard version and includes a remote control with digital reading. || Accessories: | - double foot pedal (start-stop / left-right) | - remote control

Machine attributes

weight max.:	5,0 t
workpiece diameter:	250 - 2500 mm
total power requirement:	0,75 kW
load capacity drive unit:	max. 2500 kg
load capacity rotating unit:	max. 2500 kg
weight of the machine ca.:	0,9 t
